

Copper Cannon Camp Wish List

As spring cleaning takes hold, maybe Copper Cannon can use what you no longer need?

- Walk-behind lawn mower: Of course, self-propelled is nicer, but as long as it runs well, we will take either.
- Riding lawn mower: Beauty is in the eye of the beholder. Well running is more important than looking nice.
- Leather for arts and crafts projects, not Naugahyde. Remember the hyde of the Naugah is an endangered piece of furniture.
- Gently used personal floatation devices (PFD): Most people call them life preservers or life vests, but they are not.
- Grass seed. Grass seed in the bag will last up to three years. But seed found in the Egyptian pyramids has germinated. Even if it is old, we will still spread it.
- Bags of mulch or potting soil that have been gathering dust.
- Two person cross-cut saw in good condition. What a great team building activity!
- Volunteers to lead a specialty program for the campers
 - The Twin State Woodturners come up and do pen turning for some of the campers. What is your hobby that you could share with a child for an hour?
 - Yoga
 - Environmental education
 - Fishing/fly tying
 - Cooking/desert making
 - ??
- Help with projects around camp

Late additions - so check back often!

Wheel barrow

Portable basketball standard for the pond
